

Lovelace

Health System

Dear Community,

From all of us at Lovelace Health System, we want to share a heartfelt thank you for the significant outpouring of support you have shown to our entire staff as they have worked hard caring for patients during this challenging time.

From kind messages of support, to meals and supplies delivered to our team members, your thoughtfulness has made a difference in the lives of our healthcare heroes.

Likewise, we want you to know that we are here for you. While our nation faces a pandemic, we know that many of you may be foregoing routine medical care or in some cases emergency medical care.

During the pandemic, there has been a nationwide decline in the number of patients seen in hospital emergency rooms for serious conditions including heart attack, injury and stroke. Delaying care can be life threatening.

We understand your concern and want you to know that we have continued to safely care for patients who are not COVID-19 patients throughout this time. Our ER has been, and remains, open to care for all patients. We are ready and able to manage your medical emergency in a safe environment with outstanding medical expertise and ample staff.

We have taken extra precautions and implemented processes designed to keep you and our staff safe including:

- We have separate waiting and triage areas for patients with respiratory or infectious illness: COVID-positive patients are all cared for on one floor of the hospital, with dedicated nursing and care staff contained to that floor
- This separation includes an operating room for COVID-positive patients only, with specialized instruments and cleaning protocol and a separate isolation suite for patients with COVID needing radiology procedures.
- We disinfect all areas before use by a patient
- Our staff and patients wear appropriate masks and other protective equipment
- We continue to screen all patients and caregivers for COVID-19 and test as needed
- We offer E-visits for our Lovelace Medical Group and New Mexico Heart Institute patients, allowing them to have appointments with their providers, all in the comfort of their home.
- Safety for all is our top priority

The Lovelace ERs are here for you every day, around the clock.

We welcome you to our campus for safe care.

Sincerely,

Lovelace

Health System
